Acadium, Inc. chosen to represent Colorado's most innovative technology

Acadium, Inc. is proud to be honored as one of the companies chosen from across Colorado to represent the state's most innovative technology at the CSIA DEMOgala Innovation Showcase. We welcome you to join us and the other selected DEMOgala Innovation Showcase companies at Colorado's largest technology event. We are proud to have the opportunity to bolster the technology industry through our participation in this great event, and hope you will attend to do the same. For full details, including a list of all DEMOgala Innovation Showcase companies and information about tickets, please visit CSIA's website at www.csiaonline.com.

What: From a working 6-axis hexapod robot and fascinating software innovations to a simulated chemical spill and advancements throughout the technology spectrum, the 3rd Annual CSIA DEMOgala, will be an immersive, sensory experience bringing Colorado's leaders together for a night of technology demonstrations, innovations and celebration.

Who: CSIA is Colorado's Technology Association. With more than 700 technology companies involved, CSIA is the premiere IT association in the state. Our mission is to foster innovation and a positive growth environment enabling the Colorado technology industry to compete on a global basis. We provide professional development, advocacy, industry reports, peer-to-peer connections, best practices and business opportunities for a wide-spectrum of technology companies. CSIA's activities are funded solely by members and sponsors, and any company is invited to join the organization. For more information, visit www.csiaonline.com.

When and Where: October 11, 2007 at the Grand Hyatt Hotel, 1750 Welton Street, Denver, Colorado 80202

About Acadium, Inc. – Global Solutions That Revolutionize Distance Learning

Acadium is the **first in the world** to have a patent pending system that revolutionizes distance learning. The Acadium system combines televisions, video-enabled mobile phones, and geosynchronous satellites to create a live classroom for every distance learner. Acadium's technology is designed to capitalize on advancing distance learning technology and benefit from exponential growth by focusing on two opportunistic technologies currently under-addressed – television and mobile phones. www.acadium.com
